Summary

A computer engineering grad with experience in Full Stack web development and keen interest in software engineering.

Experience

Software Engineer Intern

dubizzle

Feb 2021 - Oct 2021 (9 months)

dubizzle is the largest online classifieds platform in UAE, with 5M+ monthly visits.

- Refactored and took part in reimplementing the deliveries component (now known as dubizzle premium) across both the monolithic legacy code base and the supporting microservices.
- Removed redirects to legacy code from high traffic components of the website, improving backend API response speed by 100% (2x).
- Worked on bugfixes, configuration updates, db-migrations across both the monolithic and microservice codebase.

Technologies used: Python, Django, AWS, Docker, MySQL, Redis, RabbitMQ, Jenkins

Machine Learning Intern

SmartBridge Educational Services Pvt.Ltd

Jul 2020 - Sep 2020 (3 months)

Interned and trained as Machine learning and Deep learning Engineer and undertook development of machine learning project entitled "Identify signs of Diabetic Retinopathy in eye images" with python and OpenCV.
